

Hydrant Testing

The Village of River Forest would like to let you know that the River Forest firefighters will be around town continuing to test and flush all of the fire hydrants in town over the next few weeks. Due to the flushing, some water discoloration or cloudy appearance may occur, however this discoloration or cloudiness is harmless. Running water from a fixture in the lowest section of your home until clear will correct this problem. Please avoid doing laundry or using a dishwasher until water runs clear.

Hydrants are flushed on an annual basis to remove any sediment in the lines and to ensure all the hydrants are in working order in case of a fire.
