River Forest Tree Trails: On My Block

Brought to you by the River Forest Sustainability Commission

Activity created by Ellie Raidt, Student Commissioner
Design by Nick Taira, Graphic Designer

What You'll Need:

- String or measuring tape
- Sidewalk chalk
- A phone or laptop for the River Forest Tree Map: www.vrf.us/treemap

Instructions:

- Go to www.vrf.us/treemap to find the species of parkway trees.
- Grab your materials and look on the back of this sheet for some fun questions about trees on your block.
- Write what you found out about each magnificent tree on the sidewalk in front of it with chalk.

Use the Tree Map to identify some trees on your block! www.vrf.us/treemap

- Find the skinniest tree on your block. What kind of tree is it? How thin is it?

_____

_____

- Hug the thickest tree on your block. What kind of tree is it? How thick is it?

_____

_____

- Stand next to the shortest tree on your block. How tall is it?

_____

_____

- Look for the prettiest tree on your block. What kind of tree is it? Why do you think it's the prettiest?

_____

_____

Trees store carbon and help fight climate change!

The oldest tree in the world is 5,066 years old!

A species of tree, The Giant Sequoia, is thought to be the largest organism in the world!

River Forest is a Tree City USA and an accredited arboretum.
